

MOSAIC   
**PRODUCT** CATALOGUE

## PRODUCT DESCRIPTION

---

- Stainless steel tiles are an ideal wall covering for the kitchen or bathroom. In fact, using stainless steel mosaics to create a backsplash is often more affordable, easier to install and have a more unique result than plain flat sheets of stainless steel. Though these set of tile finishes are frost proof however they are not suitable for floors (internal or external)

- There are dozens of all-stainless mosaics, hundreds of blended mosaics with stainless accents, and several sizes and shapes of individual stainless steel tiles. Brushed stainless, polished stainless, black stainless, stainless & glass, stainless & natural stone, circles, squares, diamonds, and more!

- Although not exclusively, designed for kitchen and bathroom wall tile and backsplashes, metal mosaic tile is a decorative and highly practical surface for areas known for high moisture.

### Relevance of Mosaic Tiles

- Highly reflective and unique surfaces for aesthetic applications both interior and exterior
  - Under natural and artificial lighting effect it offers a subtle unique reflective surface only a metal mosaic tile can give.
  - It offers a moisture-resistant and stain-resistant surface that is easy to maintain

## MOSAIC PRODUCT LINE
